

# Volvo Trucks launches FM480 10x4 dumper

VOLVO TRUCKS HAS launched its FM480 10x4 Dump Truck in India, built specifically for deep opencast mining. Built on the FM13-litre platform, **Vinod Aggarwal: "The Volvo 10x4 benefits the customers with higher productivity and lower overall operating costs."**

the truck delivers 480hp, 2400 Nm torque and has a power-to-weight ratio of 7.38. The company says the higher power-to-weight ratio provides superior average speeds and thereby increased productivity, while the lower kerb weight offers superior fuel economy. The 10x4 dump truck comes with a 24 M3 rock body suitable for rough and tough mining applications.

Vinod Aggarwal, CEO of VE Commercial Vehicles, said the higher-capacity rock body will give customers a product with best-in-class productivity.

The mining sector continues to be a big draw for players in the CV segment with Tata Motors and DICV launching products targeted specifically at this sector.
